

## Specification Sheet

# AK Athletics

## Lightweight Roll-Up Mats

### Specifications:

This product meets all specifications for impact including g-max impact tested, for safe use in schools, professional gyms and home use.

The padding is the industry standard thickness of 1 3/8" and is constructed of cross linked polyethylene foam to provide firm support and protection for intense workouts and competitions.

The mat is covered in 22 ounce vinyl that is antimicrobial, antifungal and will not support mildew. To clean physical contaminants from the mat we suggest using a nonabrasive cleaner.

### Mat Color Options:

### Custom Artwork:

All logos are digitally printed with eco-friendly UV cured inks for lasting vibrance and durability.
